

Large-Hole Gemstone Leather Knot Bracelet

Components/Item# in Sample Example

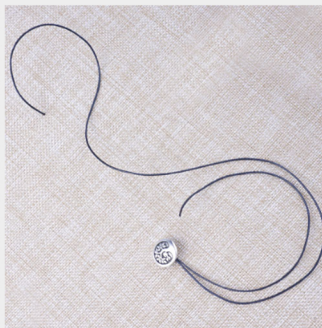

- Large-Hole Gemstones (WAF8RDLH-M-8 Matte White Howlite)
- Button Finding (TC02349 - TierraCast® Amor Button)
- 1mm Round Leather (A022063 1mm Metallic Gunmetal Leather)

Tutorial

Step 1: Measure your wrist and multiply that amount by 4. Cut the leather cord to that amount.

Step 2: Slide on button hole and make one end shorter. This short end will be the length of your wrist size + 5 inches.

Step 2: Make an overhand knot with the leather cords next to the button.

Step 4: Slide on a gemstone bead. Take the long leather piece and make an overhand knot around the shorter cord.

Step 5: Gently tighten the knot, while sliding it close to the gemstone.

Step 6: Repeat until you've reached your wrist length.

Step 7: Make an over hand knot with both leather cords to the diameter of your button. Cut off excess cord.

Step 8: Your bracelet is complete.
