

LeatherCord USA: Josephine Knot Collar Necklace

August 20, 2019 [leather](#), [Tutorial](#) [Edit](#)

Check out this lovely tutorial courtesy of Leather Cord USA. Learn to make celtic knots with leather cord and use the skill to make fun jewelry designs!

Our friend, Michelle from Leather Cord USA provided us with this great tutorial on how to tie the double celtic knot using two pieces of leather cord! Make yours today.

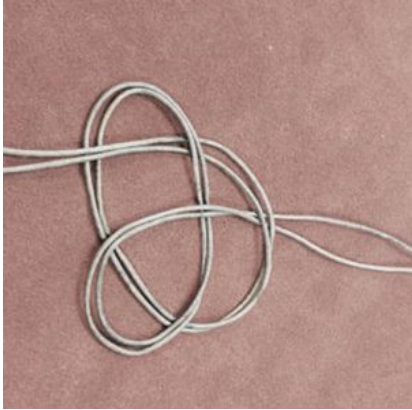

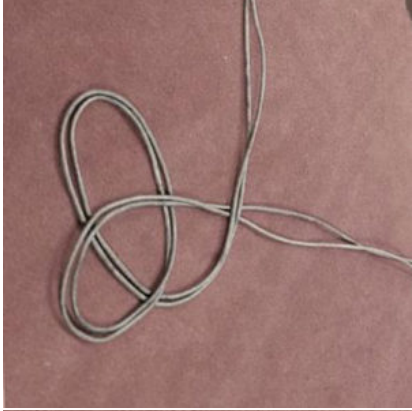

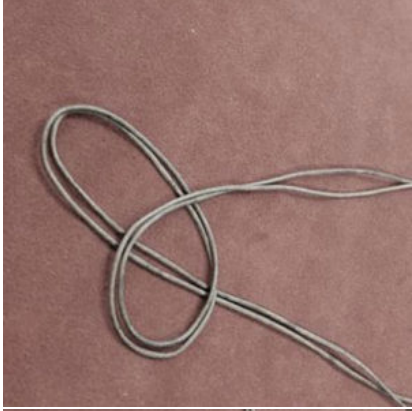

What You'll Need:

- 2 – [1.5mm LeatherCord USA Leather](#) (2 Meter Length)
- 2 – End Cap (Suggestion item# [A010436](#))
- [Large-Hole Gemstones](#)
- 10" or More of [Chain](#) link
- [Clasp & Jump Ring](#)
- Needle Nose Pliers & Cutter

Step by step instructions:

1. Take the two strands of Round Leather Cords and place evenly side by side then fold in half, creating four strands grouped in two.
2. Lay leather flat on a table or board
3. Take the right side group of two strands and create a loop laying it on top of the left strands. This will create three openings: top, middle and left (outside) as indicated in the photo below.
4. Take the left side and cross the cord over the tail of the right side then under the base of the top opening and feed through then back down the middle opening and up through the left opening.
5. Gently pull both tails while adjusting the knot into place. (Be sure to keep the strands lying flat while pulling.)
6. Repeat steps 3-5 for the left side: Take the left tail and create a loop laying it on top of the right strands. Take the right side and feed the cord over the left tail then under the base of the top opening and feed through then back down the middle opening and up through the left opening.
7. Repeat all steps to create five individual knots.
8. Feed one Large Hole Bead on the two center strands
9. Feed one Large Hole Bead on the two left strands and one on the two right strands
10. Feed a final Large Hole Bead on the two center strands
11. Repeat the knot pattern from above for another five knots.
12. Cut the top loop (starting point) in half
13. Add a drop of adhesive to the inside of the end cap and place all four strands in, give a slight twist and hold everything in place for a few seconds.
14. Repeat step 13 for the opposite side
15. Take the chain provided and judge the exact length you want the final piece to be. Cut chain in half.
16. Attach each side of the chain to the leather piece by attaching chain to end cap with jump ring. Repeat process to other end cap and chain.
17. Attach the lobster claw to one end of your chain with a jump ring. Add a jump ring to other chain end.
18. Voila!!!! You are done! Now go show off your work of art for the world to see!

Other Examples

Simplify this knot by making one knot and adding a gemstone pendant to its center loop!

You can even make a smaller version for earrings!
