Instructions

1

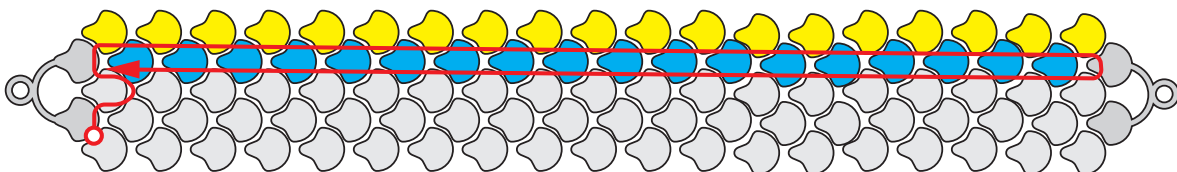

Sew through the illustration adding and alternating the two Ginko colors between the Cymbal components, total 37 beads. NOTE: this amount is good for a 7 inch bracelet. Add two more beads for a larger bracelet length or lessen two beads for a smaller bracelet length.

2

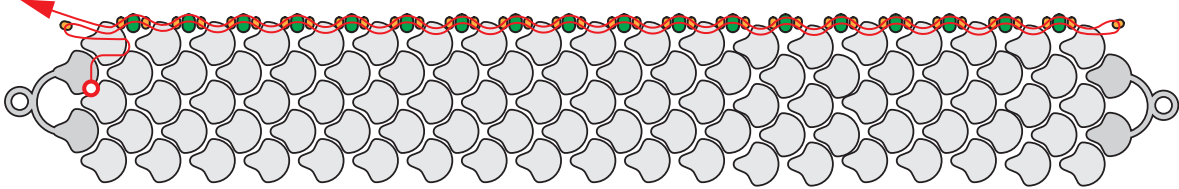

Sew the outer pattern by adding 1st color in between each bead.

3

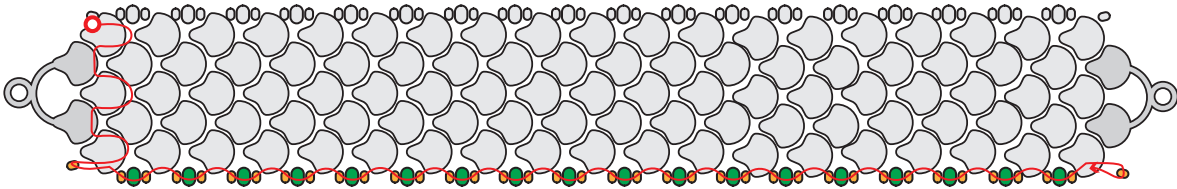

Sew through the following beads to the other outer pattern. Pick up another 37 beads and sew through other Cymbal component. Then sew through the middle beads and zip through the 2nd Ginko beads.

4

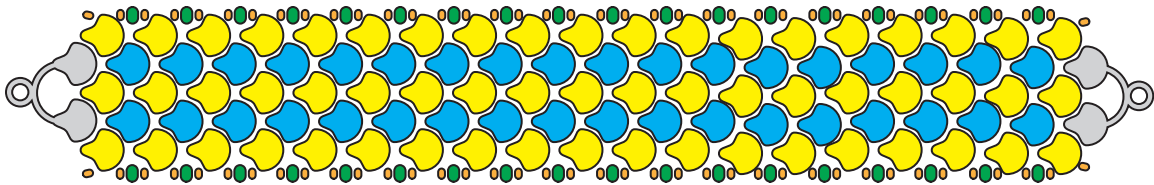

Follow illustration to outer beads. Pick up a 11/0 seed bead and through first Ginko. Pick up a 11/0, 8/0 and a 11/0 in between each Ginko beads. At the end, pick up a 11/0 and sew back through beads you've gone through.

5

Follow illustration to the other outer side of the pattern. Repeat what you did in step 4. Sew through a few beads to tie off the ends to secure ends. Cut off excess thread.

6

Attach the magnetic clasp or clasp of choice with jump rings to Cymbal ends.
