

Box Knot Bracelet

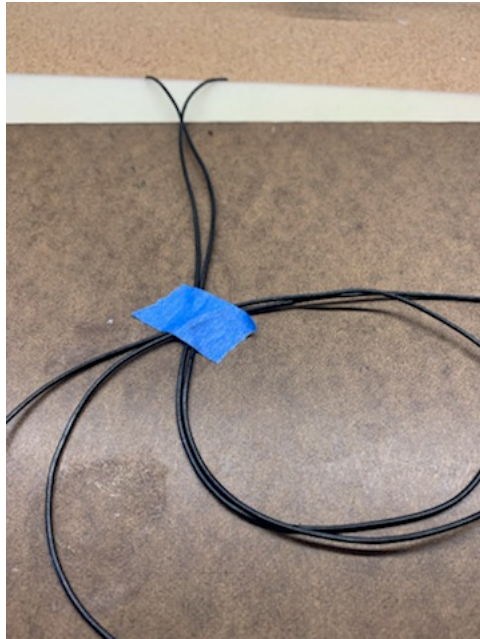

MATERIALS

4 – 12" pcs. 1.5 mm leather
4 – 6 x 10 TierraCast Crimp Beads
2 – 10 x 11 TierraCast Crimp Ends
6 – 8 mm Large Hole Beads
2 – 4 mm Oval Jump Rings
1 – Magnetic Clasp

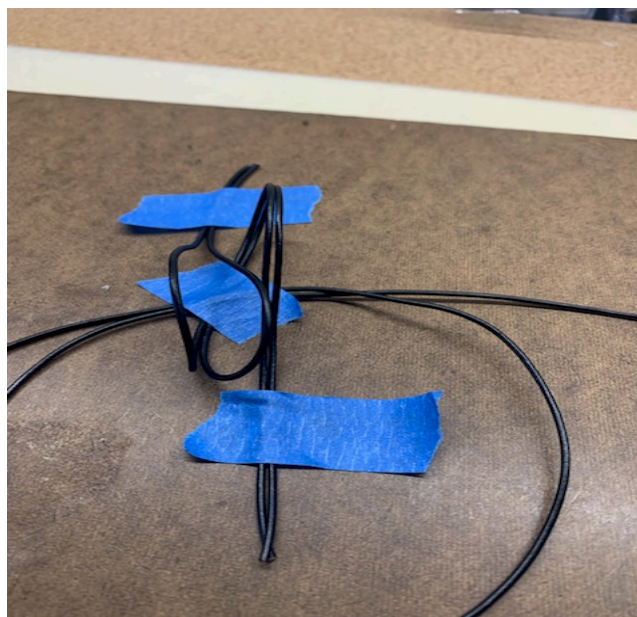

Painters Tape
Chain Nose Pliers
Bent Chain Nose Pliers
Flush Cutter
E6000 Glue
Toothpick

Directions

1. Place 2 pieces of leather vertically and 2 pieces horizontally and place a piece of tape over the center.

2. Take the top 2 pieces and loop down. Tape to hold.
3. Take the bottom 2 pieces and loop up. Tape to hold.

4. Now take the 2 right pieces over the 1st loop and under the 2nd loop.(working from right to left)
5. Take the 2 left pieces over the 1st loop and under the 2nd loop(working left to right).

6. Now hold all 8 pieces in center and remove tape. Start pulling cords to cinch in knot. To tighten pull opposite corners at same time.

7. With the 2 center pieces of leather, add 1 large hole bead. You may want to cut one end of the leather at an angle to help put the bead on. Now slide on a crimp bead, repeat 2 more times.
8. Repeat this pattern for the other side.
9. Crimp the crimp beads. I measured from the center of the knot to the center of a crimp bead approximately 1". This will make a 7" bracelet.
10. Trim excess leather to put on your crimp ends. Cut one piece of leather on an angle to fit into end.
11. With a toothpick, add the E6000 glue into the cap. Push in your 4 pieces of leather and crimp. Repeat for other side.
12. Add the 4mm jump ring and the magnetic clasp.
